INDUSTRIES.

### INSIDE THIS ISSUE:

**Minesoft on the  
map!**

**Happy Easter!**

**Software product—  
MT Sampling**

**Good Bye!**

## MINESOFT IS ON THE MAP

Minesoft was launched late in 2008 and has already released several leading software products and gained internationally recognized clients. The company was specifically started to develop products for the mining industry, in partnership with its sister companies Minxcon and Agere Project Management, however we have grown as company have various products available in other sectors as well.

## SOFTWARE PRODUCT INFO

### MT SAMPLING

#### UNDERGROUND & SURFACE SAMPLING

The Minesoft Sampling Application was developed to provide the mining industry with an easy-to-use tool to capture sampling information and produce a sample sheet. It effectively reduces the input and production time of the sample sheet.

The application adopts a wizard based approach, where the user is not able to proceed to the next step or process prior to the completion of all the required inputs for the current step.

## HAPPY EASTER

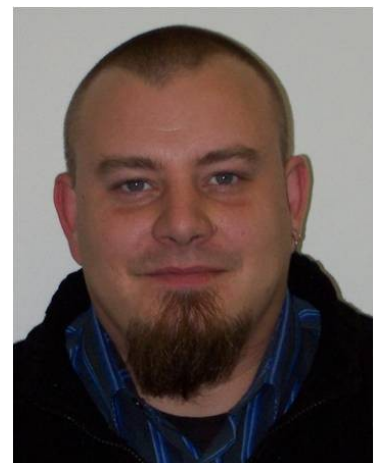

**Hope you have a  
wonderful Easter.  
Enjoy the break!**

**For those travelling,  
drive safely!**

## WE SAY GOOD BYE!

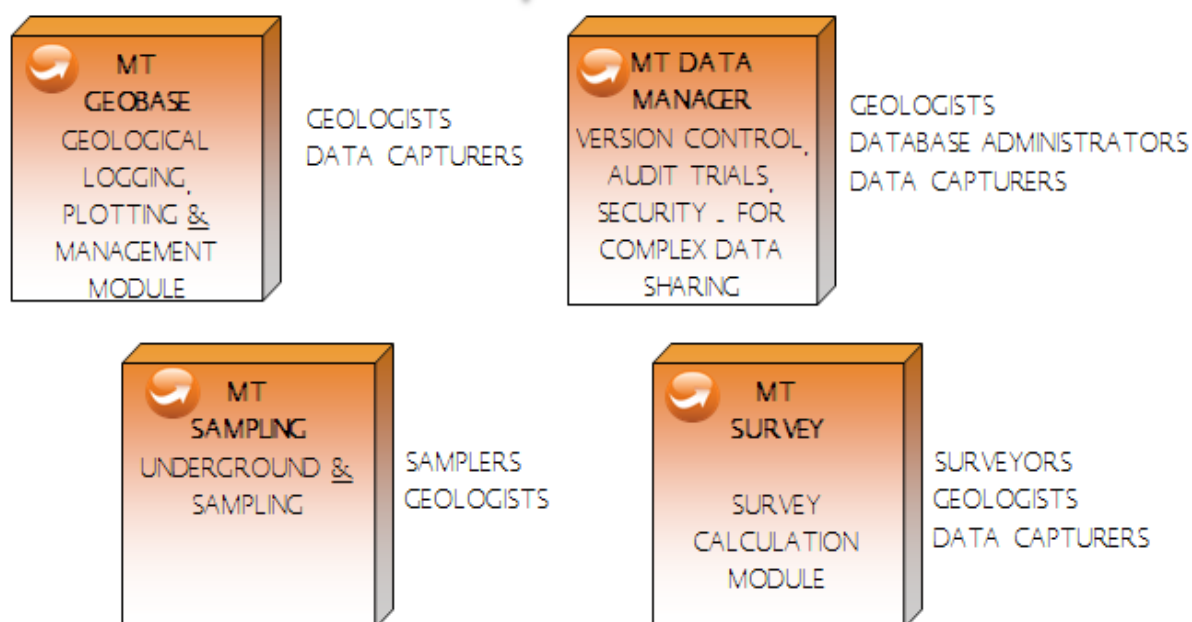

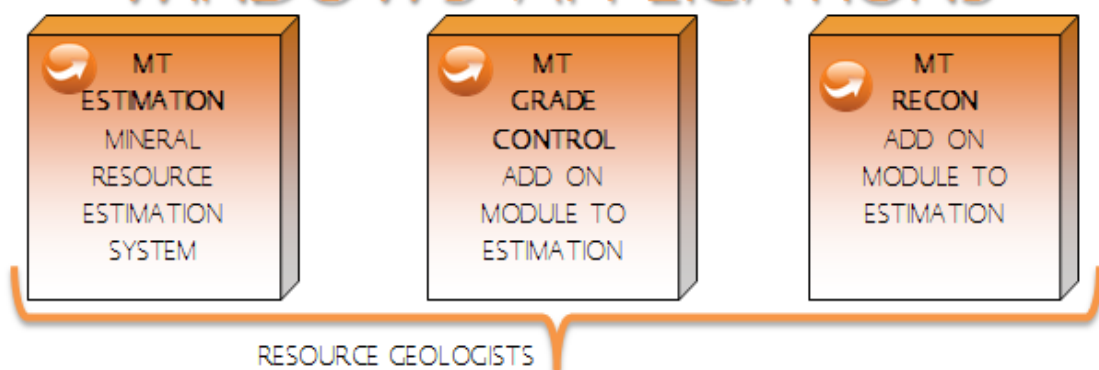

**Ruan Meyer**, one of our senior developers, is leaving Minesoft to spread his wings. Hope it goes well with you!
