EXCO Team-  
Building weekend!

Software product—  
MT GeoBase

Welcome Lizanne!

### EXCO TEAM-BUILDING WEEKEND

The executive committee of the group of companies broke away from daily office and city life and headed into the deepest wild Africa. Surrounded by nothing but nature, only a tent between them and the wild, in the heart of Botswana in the Khutse wild life reserve. EXCO had nothing else and no one else to depend on except each other. It was an incredible team building opportunity and many great ideas and positive thinking came out of the weekend. We believe in growing relationships not only within our companies but with our clients too, and pride ourselves on building strong and healthy relationships that result in excellent team work and improved productivity.

### SOFTWARE PRODUCT INFO

**MT GeoBase** was developed by Minesoft to provide a Borehole Logging system and Borehole log sheet, which works in conjunction with the Minesoft Suite of Software.

#### MT GeoBase provides a means of:

- ◇ Capturing Borehole information
- ◇ Desurveying and compositing Borehole information
- ◇ Managing the Borehole database
- ◇ Producing Borehole logs and plots
- ◇ Filtering Borehole information
- ◇ Interfaced with other Minesoft products

**MT GeoBase** is fully integrated with Minesoft's other mining products, with which it is shipped as a light version. A full version of MT GeoBase is available on its own.

**MT GeoBase** can be purchased as part of Minesoft Suite of Software or as a stand-alone module.

Deon & Travers

### WELCOME!

**Lizanne Scholtz**, our new Marketing Manager. Hope you will be very successful at Minesoft.

Lizanne got married on 7 May.  
Congratulations!
